WORK EXPERIENCE

UI/UX Engineer & Web Developer Nerve Technologies LLC, 2025 – Present USA

- Designed and developed responsive web applications and user interfaces for multiple client projects, improving usability and user engagement.
- Collaborated with cross-functional teams to deliver web solutions aligned with business goals, accessibility standards, and branding requirements.
- Conducted usability testing and implemented design and frontend improvements that enhanced website performance and user experience.

Monitoring Team Intern – Knowles Training Institute Singapore 2025

- Provided administrative support as part of the Support Team, overseeing live virtual training sessions, validating attendance, monitoring participant engagement, and ensuring smooth delivery by documenting technical issues and submitting timely reports.
- Coordinated closely with the training department to align and streamline session schedules, contributing to improved operational flow and training efficiency. Assisted in large-scale domain transfers across multiple national-level accounts, including domain configuration and DNS setup to ensure successful transitions.
